REQUEST A QUOTATION

Product Cost comparison :-

Price of the product depends on the style and heat output, these vary greatly depending on your individual need.

If you would like us to calculate your requirements we would be delighted all we need is room width x length x height in metres please.

Compared to Gas, oil, Lpg this will be at least 50% lower in price to install.

No moving parts means no ongoing costs as compared with annual maintenance that you will have with all other forms of heating.

As to fuel costs these heaters will out perform oil and lpg by a wide margin, and certainly be comparable with Gas.

The Economy Radiator Company
The Grange
Little Hutton
Sessay
